RAJ DESAI

AI-Enabled [Python Developer · Backend Developer(Django) · Data Analyst]

rajdesai1058@gmail.com | +91 7862803891 | github.com/raj-desai-07/ | linkedin.com/in/rajdesai10

PROFESSIONAL SUMMARY

Python developer with a strong focus on backend development, building Django-based web applications alongside hands-on experience across the data analysis, cleaning data, features engineering, creating ML Models, and comparing ML models using metrics like R^2. Built and deployed projects such as an appointment-scheduling system with role-based access (Arogyam) and a weather forecasting app integrated with live APIs (WeatherNow). Skilled in using AI-assisted development tools like Google Antigravity, Cursor, ChatGPT, and Claude to speed up development.

CORE SKILLS & TOOLS

Python	Django	Database	Website Core	Machine Learning	Version Control	AI Tools
Core Python	MVT Architecture	SQL	HTML	Numpy & Pandas	Git	Google Antigravity
Advanced Python	Django Admin	MySQL	CSS & Bootstrap	Matplotlib & Seaborn	Github	Claude, ChatGPT
OOPs Programing	Django Rest Framework	SQLite3	JavaScript	Scikit-learn		Postman

★ **AI Tools:** *Google Antigravity, Cursor AI, ChatGPT, Claude AI, Google Gemini*

★ **AI Automation:** *Currently learning AI Automation at **Tops Technologies**, where I'm working with **n8n** to build **automated workflows** that connect different tools and streamline repetitive tasks.*

WORK EXPERIENCE

Data Analyst Trainee | Tectona Soft Solutions *Jun 2026 – Aug 2026*

- Worked on data preprocessing and feature scaling to prepare raw datasets for machine learning models, ensuring clean and consistent input data.
- Developed and compared multiple ML models using evaluation metrics such as accuracy, precision, and R^2, selecting the best-performing model for each use case.
- Performed hyperparameter tuning to optimize model performance and improve prediction accuracy.
- **AI-Enhanced Workflow** : Used ChatGPT and Claude AI to speed up data cleaning scripts and summarize evaluation results faster.

CERTIFICATIONS

Junior Software Developer — *TOPS Technologies*

- Received an NSDC (National Skill Development Corporation)-certified Junior Software Developer certificate from Tops Technologies Private Limited, awarded under the Skill India initiative upon successful completion of a comprehensive Python backend developer training program. The certification validates hands-on

proficiency in backend development concepts and practical implementation, and was awarded with Grade A, reflecting strong performance and understanding throughout the training.

FEATURED PROJECTS

Arogyam : Hospital Appointment Booking System

- Developed a full-stack web-based hospital appointment management system with three distinct user roles: Patient, Doctor, and Admin, each with dedicated dashboards and permissions.
- Built an automated slot-generation system where doctors set their daily availability, and the system dynamically creates 30-minute appointment slots, similar to a real-world booking flow.
- Designed the patient flow end-to-end: registration/login, doctor browsing, date/doctor-based slot selection, appointment booking, and status tracking.
- Built the doctor-side dashboard for managing availability and updating appointment status.
- Developed the admin panel for managing doctors, departments, and appointments (add/view/update/delete).

- **Tech Stack:** HTML, CSS, JavaScript, Bootstrap, Python, Django, MySQL
- **GitHub:** https://github.com/raj-desai-07/Arogyam

WeatherNow – Real-Time Weather Forecast Website — *OpenWeatherMap API*

- Developed a fully responsive real-time weather forecasting web application that displays live weather data including temperature, humidity, visibility, air quality, wind speed, pressure, and sunrise/sunset timings.
- Integrated the OpenWeatherMap API to fetch and display accurate, real-time weather data along with an hourly forecast breakdown.
- Designed a modern, dynamic UI featuring weather-condition-based Images, forecast cards, and a smooth city search functionality for quick location lookups.
- Built fully responsive layouts to ensure a consistent, optimized user experience across desktop, tablet, and mobile devices.

- **Tech Stack:** HTML, CSS, JavaScript, Bootstrap, Python, Django
- **GitHub:** https://github.com/raj-desai-07/WeatherNow
- **Live Demo:** https://weathernow.pythonanywhere.com/

IP Explorer – Public IP Lookup & Geolocation Tool — *ipwho.is API*

- Developed a web application that allows users to look up any public IP address and instantly retrieve detailed geolocation and network information.
- Integrated the ipapi.com API to fetch real-time data including IP version, city, region, country, postal code, latitude/longitude, time zone, currency, and calling code.
- Displayed network-level details such as ASN (Autonomous System Number), ISP/organization name, and network range for each queried IP.
- Designed a clean, responsive UI to present fetched data in an organized, easy-to-read format for quick lookups.

- **Tech Stack:** HTML, CSS, JavaScript, Bootstrap, Python, Django
- **GitHub:** https://github.com/raj-desai-07/IPExplorer
- **Live Demo:** https://ipexplorer.pythonanywhere.com/

EDUCATION

Python Backend Development Course — *2025 – 2026*
Tops Technologies – Ahmedabad — Grade : **A**

BACHELOR OF COMPUTER APPLICATIONS - B.C.A. — *2022 - 2025*
Kamani Science College - Amreli

Class XII — *2022*
HSC – Gujarat Bord

ACHIEVEMENTS & EXTRACURRICULARS

- Participated in a **Fireless Cooking** event organized at Tops Technologies, showcasing creativity outside of coding.
- Was part of the **organizing team** for a Balloon Fly event at Tops Technologies, helping coordinate and execute the activity.
- Actively participated in **NSS (National Service Scheme)** during college, contributing to community service and social initiatives.
